

“Nanoparticles manufacturers – environmental legislation”

Satellite session | 12 February 2014 | 14:30h – 18:00h | Alfândega, Porto

Satellite session

i-Nanotool PROJECT

i-NanoTool is an European project, funded by LIFE+2012 Programme, aimed to the development of an interactive tool for the implementation of environmental legislation in nanoparticle manufacturers

i-Nanotool APPROACH

The objective of i-NanoTool is to contribute to the efficient implantation of the environmental policy and legislation in nanomaterials manufacturers companies, especially SMEs. It includes the development of an interactive platform (etool) for environmental self-diagnosis addressed to nanoparticles manufacturers in European countries. Its specific objectives are: **To** facilitate nanoparticles producers the implementation and effective application of the environmental legislation. **To** provide updated information related to environmental impact of their activity and current legislation. **To** provide updated information related to environmental management of their activity. **To** improve the environmental situation of European nanoparticles producers industries.

Programme outline

14:30h

Registration

15:00h

"i-nanotool project overview"

"Nanoparticles and Environmental legislation"

"Nanoparticles producers: how to deal with the legislation, industry cases"

17:00h

Discussion table

18:00h

Networking coffee

Organization and Registration

CeNTI - Centre for Nanotechnology and Smart Materials
registration until 5th February 2014

Egídia Ramos | eramos@centi.pt | +351 252104152

Venue

Centro de Congressos e Exposições
Alfândega | rua nova da Alfândega
4050-430 Porto | Portugal

Parallel session with:
