

Workshop on Non-conventional Fibres and Functional Materials

The first CeNTI Workshop was held last Wednesday at V.N. Famalição. Several entrepreneurs had the chance to get an insight into the technologies and equipments CeNTI is about to acquire in the field of non-conventional fibres and functional materials. The atmosphere was very dynamic, which resulted in live discussions between participants. I look forward to the next Workshop (Surface Treatments and Functional Materials, 17th October). Stay tuned here ! T. S. Mayor
