

CeNTI at the ADI's Innovation Days

June, 2009 - CeNTI will be present at the 4th Innovation Days, an event organised by the Portuguese Innovation Agency, AdI (Agncia de Inovao), from 18th to 20th of June in Lisbon International Fairground located at "Parque das Naes".

The Centre will be simultaneously attending Techtextil (International Trade Fair for Technical Textiles and Nonwovens) with a booth (Hall 3.0 C35) from 16 to 18th June.

CeNTI's presence in these events aims the promotion of the Center RD + i activities, exemplified by technologies such as conductive bicomponent fibres, surface functionalization by plasma treatment, nanostructured and nanocoated materials as well as flexible photovoltaic systems.

The 4th Innovation Days aims to promote the results of successful market-oriented R&D projects from EUREKA, boosting their economic exploitation and promoting new partnerships between companies, researchers and investors. It will take place together with TECNOFIL, an umbrella event, gathering other 3 specialized events ENDIEL, SINOTEC and Ambiorde.

Based in Portugal, a highly qualified research team works with partners around the world, to develop multicomponent fibres, smart materials and multifunctional coatings. This research will contribute to improve and assess the real performance of materials and products in different areas (e.g. well-being & health, sports, protection, automotive, aeronautic, renewable energy devices…).
